Subject: My IM-6 Speedster

Henry,

In September 2003 while waiting for a flight I bought a copy of Excellence Magazine (I still have it) and read the article "Fax Me a Copy" by David Coleman. As you know it is about a 2.7L 911 Porsche powered 59 Carrera GS/GT Speedster you built. Since then I have had this lingering thought of maybe, someday, I would own one. That day finally came on July 9, 2010 when I picked up my Speedster at your shop.

I had a vision of what my 3.0L Porsche 911 powered 59 Carrera GS/GT Speedster would be with a few twists of my own. Somehow I guess either I was able to communicate that vision to you verbally or maybe you are actually an alien that lives inside your customer's heads during the build process. It doesn't really matter which because all I know is you and your staff were able to make my dreams a reality. The Speedster you created for me is exactly what I was hoping for and much, much more.

Thank you my friend from the bottom of my heart.

Regards,

Dave Mitchell
